

Constellation's OnLocation-Schedule Wins Another Industry Award

Markham, ON, February 4, 2008 – Constellation HomeBuilder Systems, the largest provider of [homebuilding software](#), is pleased to announce that Constellation [OnLocation-Schedule has won the Constructech Top Products 2008 award](#).

Constructech selected Constellation OnLocation-Schedule for its ease of use and extremely powerful [field scheduling](#) functionality. Designed for both superintendents and construction managers, [OnLocation-Schedule](#) ensures that everyone is up-to-date and that building progress is closely monitored.

"We congratulate Constellation HomeBuilder Systems for winning a Constructech Top Products award," said Mike Carrozzo, editor, Constructech magazine. "Customers using this product have had great success managing construction schedules and payment processes from the field." This is yet another benefit that Constellation provides to its customers. With an unsurpassed dedication to the homebuilding industry and continued investment in new technologies, Constellation is positioned to lead the industry for many years to come.

As part of the OnLocation suite of mobile device applications, OnLocation-Schedule is one piece of the big picture. Coupled with [NEWSTAR Enterprise](#) and [Constellation Focus](#), OnLocation is the basis for a powerful system of schedule management, supplier and trade performance measurement, and timely report generation and distribution. Many builders have used this system to achieve better supplier and trade relationships, while increasing customer satisfaction with fewer mistakes and improved cycle times. Using OnLocation-Schedule's "Complete with Exceptions" feature has allowed builders to withhold payments for work that was done incorrectly, while allowing the building schedule to proceed in many cases. In addition, the use of Constellation Focus allows suppliers to be given a statement that identifies all the tasks for which payment is being held, reducing the number of phone calls and providing a clear incentive for completing the work as soon as possible.

"We are very excited about OnLocation-Schedule being selected for another homebuilding industry award," exclaims Dexter Salna, President of Constellation HomeBuilder Systems. "Constellation listens to its customers and develops the solutions that will improve their businesses. We have a strong group of early adopter customers that deserve a lot of credit for helping us develop award winning applications. These relationships improve product quality and ultimately improve the solutions that we can offer to other homebuilders."

About Constructech

A division of Specialty Publishing Co., Constructech advises 40,000 unique builders and contractors in all trades within the homebuilding market on the technology, services, and automated home technology that help improve business and increase margins.
