

OpenEdge Advanced Business Language- APPLICATION DEVELOPER

THE COMPANY

Innovative software solutions from Constellation HomeBuilder Systems empower homebuilders with information to effectively manage and grow their business. Our software helps our builders position themselves for growth, financing, acquisition, or IPO. Our customers are climbing the BUILDER 100 with Constellation as their trusted technology partner.

Constellation's commitment to homebuilding software is second to none, with over 100 employees dedicated to software development and support, and constant enhancements to our solutions. Backed by Constellation Software, we are committed to homebuilders and the technology that powers them.

From planning to homeowner services, we have land development software, new home sales and marketing software, production, purchasing, scheduling, accounting, warranty, as well as vendor and homeowner portal solutions designed exclusively for the homebuilding industry.

Constellation's product suite includes NEWSTAR, BuildSoft Pro, HomeOwner Central, HomeDev Pro, FAST, Sales1440, Constellation Web Solutions, BuildTopia, and Builder 360.

THE POSITION

The OpenEdge ABL Application Developer is stationed within our Markham Ontario office and is a talented, self-directed and self-motivated individual with strong technical skills and demonstrated verbal and written skills. This candidate will produce high quality, testable and reliable OpenEdge ABL code and implement complex enterprise grade computer application programs. Additionally, this candidate will be self-sufficient in troubleshooting and apply due regard for the efficient use of computing resources.

The OpenEdge ABL Application Developer concentrates on our company's largest ERP solution with responsibilities that include:

- Enhance and extend existing OpenEdge ABL programs to increase operating efficiency, enhance the customer experience, and adapt to new requirements as required
- Determine resolutions to identified customer software issues and QA bugs
- Follow existing coding standards and development best practices
- Analyze program specifications for logic and conformance to written specifications and standards
- Work with deadlines in relation to product release timelines
- Other duties as assigned by management

QUALIFICATIONS

- General skills and knowledge
 - Aptitude to learn programming languages quickly
 - Excellent analytical, problem solving, and multi-tasking skills
 - Effective verbal and written communication skills
 - Ability to work effectively with others and independently
 - A self-motivated, organized, and reliable individual, with the ability to produce quality work in a timely manner
- Specialized skills and knowledge
 - Designing efficient and complex Microsoft SQL queries
 - Asset to have: OpenEdge ABL, C#, ASP.NET, HTML and internet standards, XML and other modern technologies
- Education and work experience
 - Bachelor's degree in computer science, engineering, math, or related area with an equivalent combination of education and experience.

In addition to the above role-specific requirements, we have expectations that apply to all of our team members, including:

- Honesty
- Concentrated focus on the user experience
- Work outside your comfort zone
- Confident and passionate, but no ego
- Patience with others

We are focused on changing the construction industry through great software, and are looking for exceptional people to join us that are passionate about the user experience. You will be working closely with other team members, so you must be willing to work in our Markham, Ontario, Canada office.
